DETAILED ACTION

1. The prior office actions are incorporated herein by reference. In particular, the observations with respect to claim language, and response to previously presented arguments.

- Claims 1-18 have been allowed.

Allowable Subject Matter

2. Claims 11, 13, 16-20, and 25-29 are allowed over the prior art of record.

The following is an examiner's statement of reason for allowance:

3. The closest prior arts of record are BALL et al., SUZUKI, YOSHIOKA, FREENY, JR., and ENDOH. Ball discloses a record/playback apparatus as claimed except that it fails to disclose that payment is imposed upon the user based upon dubbing speed selected by the user and causing the record/playback unit to start the recording at a standard dubbing speed without transmitting the basic data to the payment imposing unit. Suzuki teaches an information providing apparatus that enables user-selected information to be recorded and enables the user to select a speed at which the information is transmitted and recorded to a local terminal, wherein payment is imposed on the user based on the selected transmission or recording speed. Yoshioka teaches a digital disc reproduction system that includes a control unit to control the recording operation in fast speed dubbing mode as well as standard speed dubbing mode using a selector switch. Yoshioka also teaches that the recording is started in the standard speed-dubbing mode without transmitting any data to a payment-imposing unit since Yoshioka is not concerned with paying for the service.

4. As the rendering of the decision by the Board of Patent Appeals and Interferences on November 21, 2006 clearly states, in regards to claims 1 and 11, the closest prior arts of record BALL et al., SUZUKI, YOSHIOKA, FREENY, JR., and ENDOH, when taken either individually or in combination with other prior arts of record, that the combination of arts mentioned above fail to fairly teach, suggested, or motivated one skilled in the art at the time of the invention to dub a copy at standard speed without charging for it, while at the same time charging for copies dubbed at higher than standard speeds. Both

Ball and Suzuki describe systems that assess some charge for each copy made or program provided regardless of speed, because they are designed to pay a royalty to the copyright holder for every copy.

5. Claims 2-10 and 12-18 are dependent upon independent claims 1 and 11, thus they all have the limitations of independent claims 1 and 11. Therefore, they are allowable for that same reason stated above.

Conclusion

6.
